Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1 - 57	YES
	Claims		NO
Inventive step (IS)	Claims	1 - 26, 28 - 57	YES
	Claims	27	NO
Industrial applicability (IA)	Claims	1 - 57	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

1 Reference is made to the following document:

D1: US-A-3 736 969 (WARN H, SW ET AL)
5 June 1973 (1973-06-05).

2. INDEPENDENT CLAIM 1

2.1 Novelty

Document D1 is considered to be the prior art closest to the subject matter of claim 1. Said document discloses a functional element as per the preamble of claim 1.

The subject matter of claim 1 consequently differs from the subject matter of document 1 in that an annular recess is provided between the annular lip and the free end-face of the stamped segment.

The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

Box No. V**Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****2.2 Inventive step**

The problem of increasing the strength of an assembled component by using thick sheet metal parts is solved in that, in addition to the use of the annular groove and the annular lip (see the description in the application, page 18, lines 21-22), the annular recess allows the functional elements to be attached even more securely to the sheet metal part (see page 19, lines 12-20).

The solution to the above problem, as proposed in claim 1 of the present application, involves an inventive step (PCT Article 33(3)). The reasons are as follows:

the available prior art contains nothing that might encourage a person skilled in the art to arrange the annular recess in such a manner.

3. INDEPENDENT CLAIM 27

3.1 Dependent claim 27 does not contain all the features disclosed in claim 1. Claim 27 should therefore be considered an independent claim.

3.2 The subject matter of claim 27 differs from the functional element known from D1 in that the lip is annular.

PCT/EP2004/012991Box No. V **Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

The solution to the above problem, as proposed in claim 27 of the present application, cannot be considered inventive (PCT Article 33(3)). The reasons are as follows:

the lip is annular because the stamped segment, likewise, is annular; a rivet with an annular stamped segment is a conventional design in the art.

4. INDEPENDENT CLAIM 34**4.1 Novelty**

Document D1 is considered to be the prior art closest to the subject matter of claim 34. Said document discloses an assembled component as per the preamble of claim 34.

The subject matter of claim 34 consequently differs therefrom in that the sheet material fills the annular recess, at least in part.

The subject matter of claim 34 is therefore novel (PCT Article 33(2)).

4.2 Inventive step

The arguments in this regard are similar, *mutatis mutandis*, to those set out in Box 2.2 above.

PCT/EP2004/012991**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****6. INDEPENDENT CLAIM 57****6.1 Novelty**

The available prior art does not disclose either a functional element with the features of the preamble of claim 57 or a method for the manufacture thereof as per the characterising part of claim 57.

The subject matter of claim 57 is therefore novel (PCT Article 33(2)).

6.2 Inventive step

The available prior art contains nothing that might suggest to a person skilled in the art either a functional element of this kind with an annular lip and an annular recess between said lip and the free end-face of the stamped segment or methods for the manufacture thereof.

The solution to the above problem, as proposed in claim 57 of the present application, therefore involves an inventive step (PCT Article 33(3)).
